

This project was made by some local dedicated people who have an interest in genealogy, finding graves of loved ones, doing their family tree, or just interested in knowing where their ancestors/family lie.

The Bohillane Cemetery project was transcribed – photographed - sketched on Tuesday 24th September 2013 & uploaded fully onto the website on 11th October 2013.

Tools used: Led Torch with 245 lumens + Camera with GPS ie Sony HX5V + Mirror + Great eye-sight! Without the Led Torch- all 33 headstones would not have been transcribed – it was a very useful implement!
